

Autumn in Class 5, Year 2

I loved listening to the sounds of the Indian villages

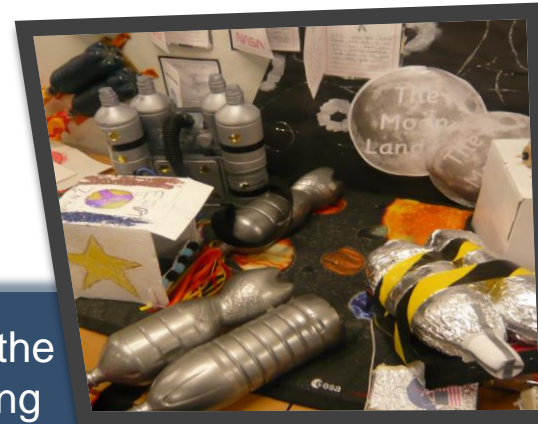

The children explored the setting of the story The Tiger Child. They used drama and their senses to develop their descriptive language.

This term Class 5 loved learning all about India and The Space Race.

Over the half term we set the children the task of creating their own space equipment read for our space topic. The children and their parents made some incredible models!

In DT the children created their very own space buggies. They thought about the design of the buggy and the equipment they would need, they explored with construction kits to see if their designs were appropriate, next they made their buggies and finally they evaluated their models.

My space buggy worked so well. I had to be careful when attaching to wheels to make sure they moved together
