

Autumn 1 in Class 9 Year 4

I loved making a temple. It was so much fun!

Class 9 have enjoyed learning in Year 4. They have experimented with electrical circuits, created Greek Temples and had fun during Curriculum Week.

During Eco week I wrote a letter to Prince Charles... I hope I get a reply.

We loved the Eco Week because we could create items out of tin cans which would normally be thrown away!

We loved creating Eco t-shirts, and recycled aprons.

Autumn 2 in Class 9 - Year 4

We loved using the pasta to make sets when we had to multiply. Working together and sharing skills helps us to learn in a different way.

Using equipment helps me to understand my learning. I prefer practical lessons when I am unsure about what I am learning.

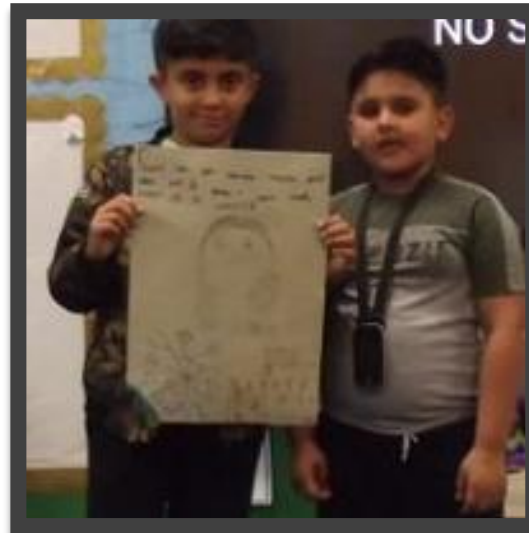

We love team work and sharing ideas. Sometimes we disagree and other times we agree.

We have realised that many brains are better than one.

Class 9 have enjoyed learning through practical activities, using apparatus in Maths and musical instruments in Science, when exploring Sound.

This half term the children have developed their confidence to present in the classroom and they have also developed their cooperative skills, using *Kagan Cooperative* activities.

I enjoy making things for school. It helps men to learn.

My Mum helps me with my projects and it is a special time for me.
