

Autumn in Class 10, Year 4

Eco week was my favourite when we made our own pencil pots from recycled bottles.

I love history!

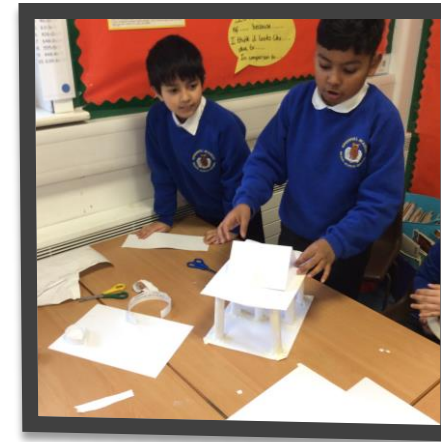

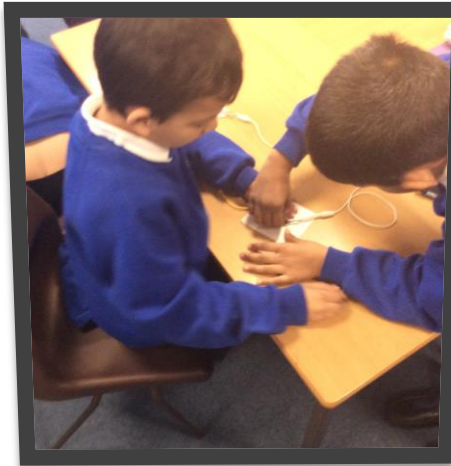

Class 10 loved learning all about the Ancient Greeks this half term. In literacy we looked at lots of different myths.

We made our own timelines for the Ancient Greeks.

We made our own Greek temples using paper and card which we then painted.

Class 10 loved their science topic – electricity. We asked lots of questions and investigated insulators and conductors.

We got very messy making Greek temples.
