Paul Armstrong went on the moon.

There were three astronauts that went to space in the Apollo 11 space rocket.

The space rocket left England in 1969

The astronauts who went to the moon were called Neil Armstrong, Buzz Aldrin and Michael Collins.

Michael Collins was the pilot of the Luna Space Module.

Neil Armstrong called the Luna Module rocket, the Eagle.

It took 4 days to get to the moon.

They collected aliens when they were on the moon.

The moon was dusty and warm because the sun was blinding.

They build a house and still live on the moon.

They planted a tree on the moon.

They planted a flag on the moon.

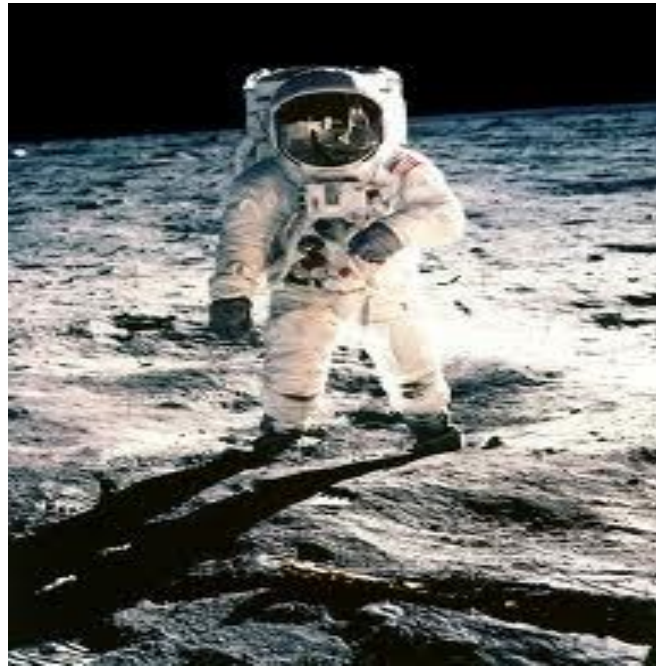

They landed the Eagle space rocket in the Sea of Tranquillity.

The Moon Landing
